Software Engineer || Full-Stack Developer

Full-Stack Developer with strong technical skills in HTML, CSS, JavaScript, Node.js, and React.js. Agile/Scrum team experience paired with leadership, adaptability, and resilience developed through U.S. Air Force service. Committed to building user-focused applications and contributing to high-performing development teams.

WORK EXPERIENCE

Creating Coding Careers

Remote

Software Engineer Apprentice

Jan 2025 - Present

- Immersed in an intensive full-stack development program, building strong proficiency in HTML, CSS, and JavaScript through daily hands-on coding and project-based learning.
- Developing a diverse range of challenging projects, including a to-do app, mortgage calculator, and adventure planner, using React.
- Collaborating daily on team coding challenges in a Scrum-led environment, strengthening problem-solving and agile development skills.

US Airforce

Joint Base McGuire-Dix-Lakehurst, NJ

Material Acquisition Manager (Senior Airman/E-4)

Jan 2023 - Jan 2025

- Developed and tracked purchase requisitions in an Integrated Workplace Management System (IWMS), providing customers and leadership with accurate work order status updates and estimated completion timelines.
- Managed training portfolios for 12 team members, certifying 293 task qualifications outlined in the USAF Career Field Education and Training Plan (CFETP).
- Built and maintained vendor relationships to create and submit purchase orders for special-order products and replenish depleted inventory, ensuring continuous operational readiness.
- Stepped into a leadership role typically held by a Technical Sergeant (E-6), overseeing procurement operations and ensuring the cost-effective and timely completion of over 1,500 work requests and projects annually.

US Airforce

Joint Base McGuire-Dix- Lakehurst, NJ

Electrical Systems Journeyman (Airman First Class/E-3)

Jan 2020 - Jan 2023

- Performed operations and maintenance on a 50–13,000-volt electrical distribution network spanning 42,000 acres, delivering uninterrupted power to over 52,000 customers.
- Managed two critical safety programs, inventorying 118 pieces of Personal Protective Equipment (PPE) to ensure compliance with USAF safety regulations for a 25-member team.

EDUCATION

Arizona State University Tempe, AZ

Software Engineering

Jan 2021 - N/A

|-------------------------------------|---------------------------------------|-----------------------------------|
| ● HTML | ● CSS | ● JavaScript |
| ● Node.js | ● React.js | ● Bootstrap |
| ● Leadership and Team Management | ● Problem-solving and Decision-making | ● Communication and Collaboration |
| ● Attention to Detail and Precision | ● Adaptability and Resilience | ● Training and Mentorship |

PROJECTS

Adventure Planner

Creating Coding Careers

Apr 2025 - Apr 2025

Designed and developed a responsive web application that allows users to plan personalized day trips based on weather forecasts and local activities. Integrated the Open-Meteo and OpenTripMap APIs to fetch real-time weather data and recommend outdoor, food, music, and art-related events. Built custom search functionality using user-provided location, date, and interests.

Technologies: React.js, Webpack, Axios, Open-Meteo API, OpenTripMap API, HTML5, CSS3, Bootstrap
